Price List BATH/_ROOM

BATH/_ROOM

A space for wellness.

The dynamic and often chaotic lifestyle makes us look for more and more relax in our home spaces. For this reason the concept of “bath” has turned into an actual “room” through the integration of specific functions related to its use. The bathroom environment is no longer only a room where we place toilet facilities, but also an area dedicated to relaxation and self-care.

A space where aesthetic and sensory values become more and more important.
